

A method for the identification of pure organic compounds by a systematic analytical procedure based on physical properties and chemical reactions

Filesize: 6.7 MB

Reviews

Extensive manual! Its this kind of very good read through. I actually have read and that i am confident that i am going to planning to study once again once more in the future. I am easily could possibly get a delight of looking at a composed publication.

(Ryder Purdy)

A METHOD FOR THE IDENTIFICATION OF PURE ORGANIC COMPOUNDS BY A SYSTEMATIC ANALYTICAL PROCEDURE BASED ON PHYSICAL PROPERTIES AND CHEMICAL REACTIONS

To download **A method for the identification of pure organic compounds by a systematic analytical procedure based on physical properties and chemical reactions** eBook, remember to access the link under and save the ebook or gain access to additional information that are have conjunction with **A METHOD FOR THE IDENTIFICATION OF PURE ORGANIC COMPOUNDS BY A SYSTEMATIC ANALYTICAL PROCEDURE BASED ON PHYSICAL PROPERTIES AND CHEMICAL REACTIONS** book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 70 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 Excerpt: . . . the alkali used for the blank experiment is represented by a; and the quantity consumed by the alkali after being heated with the substance, by 6. Then--If this equivalent is found to have a value greater than 500, pass on to Genus VII; for in this case the compound can not be a species described in either Genus V or VI. If, on the contrary, the equivalent has a value less than 500, a search must be made through the proper divisions of the tables of Genera V and VI for a species whose physical constants and saponification equivalent correspond to those found for the substance. If this search leads to the discovery of an apparently corresponding species, the identification may sometimes be satisfactorily completed by the application of special tests suggested in the text. In all other cases, provided the supply of substance remaining permits, it is best to saponify a larger quantity, By saponification equivalent is here meant the number expressing how many grams of a compound would be required to just neutralize 1000 cc. of normal sodium hydroxide solution in a saponification experiment. and isolate and identify its acid, or alcohol, or both, by the methods given under Procedure 2. PROCEDURE 2. Saponify with aqueous alkali as directed below under A. Identify any neutral saponification products (alcohols, phenols, or ketones) as directed under B, below, and any acid saponification products according to C, p. 116. A (Saponification). Fit a 250-cc. round-bottomed flask with a...
