

The Art and Science of Sailmaking (Paperback)

By Samuel B Sadler

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.From the PREFACE. The Author of this work is sanguine that it will meet with a favourable reception, not only by the Sailmaker, but also by those who use sails, as no book has hitherto been published, to his knowledge, which deals with the subject of Sailmaking in a really scientific manner. He is convinced that no manufacture can be successfully carried on without fixed principles or methods to guide the workman. That art and science are required in Sailmaking is evident from the fact that a sail, after it has been in use for a time, should compare favourably in every detail with the plan and specification given to the maker, and have all the qualities of a flat and lifting sail. The Author uses the word lifting advisedly, as it is a most important and, indeed, essential feature in a fore and aft sail that it be a help in lifting the vessel out of the trough of the sea, and keep her free and lively upon the surface. He does not hesitate to add that,...
