Pearson Education (US). Hardback. Book Condition: new. BRAND NEW, Metaskills: Five Talents for the Robotic Age, Marty Neumeier, In a sweeping vision for the future of work, Neumeier shows that the massive problems of the 21st century are largely the consequence of a paradigm shift-a shuddering gear-change from the familiar Industrial Age to the unfamiliar "Robotic Age," an era of increasing man-machine collaboration. This change is creating the "Robot Curve," an accelerating waterfall of obsolescence and opportunity that is currently reshuffling the fortunes of workers, companies, and national economies. It demonstrates how the cost and value of a unit of work go down as it moves from creative to skilled to rote, and, finally, to robotic. While the Robot Curve is dangerous to those with brittle or limited skills, it offers unlimited potential to those with metaskills-master skills that enable other skills. Neumeier believes that the metaskills we need in a post-industrial economy are feeling (intuition and empathy), seeing (systems thinking), dreaming (applied imagination), making (design), and learning (autodidactics). These are not the skills we were taught in school. Yet they're the skills we'll need to harness the curve. In explaining each of the metaskills, he offers encouragement and concrete advice for mastering their intricacies. At the end of the book he lays out seven changes that education can make to foster these important talents. This is a rich, exciting book for forward-thinking educators, entrepreneurs, designers, artists, scientists, and future leaders in every field. It comes illustrated with clear diagrams and a 16-page color photo essay. Those who enjoy this book may be interested in its slimmer companion, *The 46 Rules of Genius*, also by Marty Neumeier. Things you'll learn in *Metaskills*: - How to stay ahead of the "robot curve" - How to account for "latency" in your predictions...
